Introduction to Copyright

Any publication is automatically protected by copyright law

Two different aspects

- Paternity:
right to be named as author → non-transferable
- Economic rights:
authorization to distribute copies of the publication → transferable

Swiss Copyright Law

- The author has the exclusive right to decide whether, how and when their work is used ([Art. 10 CopA](#))
- However, there are some **exceptions** for ([Art. 19 CopA](#)):
 - private use in the personal sphere or in a private circle
 - **educational purposes**
 - copying of a work in enterprises/institutions

Let's play

How it works:

1. You are going to be divided into groups (3-5 students)
2. Each group must completely fill out a bingo using the given stickers
3. As soon as you have filled in the form correctly, shout “**Bingo!**”

The trainers will visit the groups to check that everything is going well.

Creative Commons – Principles

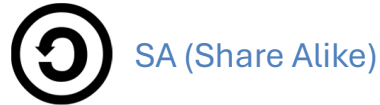

Comprehensive assignment of rights

4 Elements

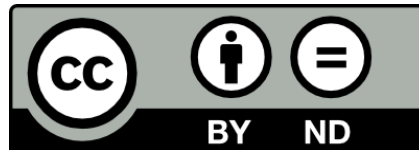

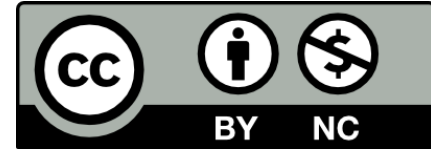

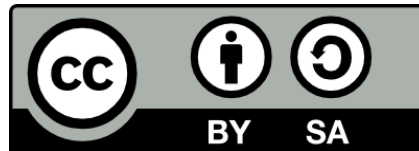

Minimum

Restrictions

6 Licenses

Creative Commons

Some Points to consider

- No contract necessary
- No revocation
- No additional restrictions (legal or technical)
- Reused material must mention original license
- Violation of CC = Violation of Copyright
- Restrictions may hinder distribution in some contexts
- **Choose a license as open as possible**

Feedback

- Jeu relativement court (~ 30 min.), donc facile à insérer dans un module de formation
- Favorise l'échange de connaissance et d'expérience entre les participant-es
- Orientation « cas pratiques » et adaptable
- Amène souvent d'autres questions de la part des participant-es
